Bundt cake!

No one knows for sure when and where the Bundt cake was first made. The only thing we can say for a fact is that it is the oldest cake that comes out of a mold.

The Germans, the French, the Italians and the Austrians have all laid claim to it. It was served only at European courts and only the extremely wealthy, privileged minority could afford it, all the way until the beginning of the 20th century. The Bundt cake is a one of a kind not only because of its shape and taste but because you can eat it at any time of the day and with any drink.

Bermet!

"The drink of the gods from Fruška Gora"

Bermet is a dessert wine made with spices, herbs and dried fruit.

Traditionally, it has been made in Sremski Karlovci for several centuries.

Red or white, depends on you. Like the Gugelhupf, various drinks and legends have been tied to the Bermet. In any case, if you are missing a little bit of something in your everyday life, a glass of Bermet and some good company will certainly do the trick.
